

REACH (EG No. 1907/2006) declaration of conformity

Since 27. June 2018 the standard metal materials which are used for the production of turned parts such as spacers are no longer REACH compliant.

This concerns primarily following materials:

Brass: CuZn39Pb3 (Material No. 2.0401)

Steel: 11SMnPb30 (Material No. 1.0718)

Aluminum: AlCuBiPb / AlCu6BiPb (Material No. 3.1655),

The concentration of lead (CAS No. 7439-92-1, EC No. 231-100-4) is greater than 0.1% of the mass fraction for all the materials mentioned.

We hereby inform you that the steel, brass and aluminum **standard** products supplied to you contain a concentration of more than 0.1% by weight of lead.

All other products supplied by us continue to comply with the current version of the REACH regulation dated 23.01.2024 (240 Substances).

Feel free to contact us if you have any questions.

Date: 20.02.2024
